TTUFF 3G WIRELESS OPS PLAYERS

The new line of TTUFF 3G wireless enabled OPS (open pluggable specification) players not only simplify your digital signage network but also provide real savings over traditional land line connected systems.

Available in both Intel® Core i3 and Core i5 configurations and fully compatible with all OPS integrated displays, the new TTUFF OPS players have the power you need to drive your M2M (Machine-to-Machine) and digital signage projects all supported by the TELUS and Sprint world class wireless networks.

<h4>CONNECTIVITY MADE SIMPLE:</h4> <ul style="list-style-type: none"> • No long term contracts • No system activation fees • Simplified monthly billing • Real time network monitoring • Hibernation options – only pay for what you use • Coverage to over 97% of Canadian population 	<h4>GREAT RATES:</h4> <ul style="list-style-type: none"> • 1 GB data/month = \$34 • 2 GB data/month = \$49
